CAREER OBJECTIVE

Motivated B.Tech CSE(Artificial Intelligence & Machine Learning) student interested in solving complex problems through technology.

ACADEMIC QUALIFICATIONS

CSE (Artificial Intelligence and Machine Learning)	2023 - Present
GMR Institute of Technology	Rajam, India
Cgpa:9.33	

Intermediate (MPC)	2021-2023
Narayana Junior College	Srikakulam, India
Marks:973/1000	

Secondary school (Tenth)	2018-2019
Oxford High School	Srikakulam, India
Marks:594/600	

PROJECTS

Expense Tracker - Budget Buddy

- Developed a MERN stack application with features like category-based expense filtering, expense charts, and secure authentication (login/signup).
- Designed an user-friendly interface for effortless daily expense tracking with clear data visualizations. Learned and implemented real-world concepts during a summer internship, gaining strong practical experience.

Tech Stack: React.js, Node.js, VS Code

Adaptive Traffic Control System using Computer vision and QAOA

- Developed a smart traffic optimization system using Computer Vision and Quantum Computing techniques to reduce traffic congestion and vehicle delays at intersections.
- Implemented YOLO-based vehicle detection with QAOA and Tabu Search optimization methods to improve traffic signal efficiency and support smart city traffic management.

SUMMER INTERNSHIP

MERN FULL STACK-BRVS TECH LLC, Visakhapatnam

Duration: [02/06/2025 - 28/06/2025]

- During my one-month summer internship I have gained hands-on experience in **MERN Full Stack Development**
- The internship introduced me to **HTML, CSS, JavaScript, and React.js**, helping me to design responsive, interactive user interfaces.
- It also improved my understanding of full-stack development concepts and enhanced my coding practices.

TERM PAPER

- Studied the working principles of autonomous parking systems using sensors, cameras, artificial intelligence, and automation technologies.
- Analyzed the advantages and real-world applications of autonomous parking systems in improving parking efficiency, reducing traffic congestion, and enhancing road safety.

CERTIFICATIONS

- Introduction to Generative AI - **Google Cloud- Coursera**
- Foundations: Data, Everywhere - **Google - Coursera**
- Python Programming: Basic Skills - **Codio -edX**
- Career Pathway: Computer Vision Engineer - **Lnt**
- Ethical Hacking -**NPTEL**
- Software Engineering - **NPTEL**
- Introduction to Quantum Computing: Quantum Algorithms and Qiskit - **NPTEL**

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend & Database:** MySQL, Node.js
- **Programming Languages:** C, Python, Java
- **Tools:** VS Code

SOFT SKILLS

- Time management
- Problem-solving
- Teamwork

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.
